Biographical Sketch - September 22, 2003

Growing up just outside of Chicago, Brian chose to pursue his dream of designing world-famous buildings by attending Penn State in the Architectural Engineering Program, structural option. He is currently in his fifth and final year, and will graduate in May 2004 with two degrees, Bachelors of Architectural Engineering and Masters of Architectural Engineering. Last fall he had the opportunity to spend a semester gallivanting across Europe and studying at the University of Leeds, England. He enjoys his time in the mountains of Central PA and is actively involved on and off campus. His professional activities include the Student Society of Architectural Engineers (President) and the Structural Engineering Association. If you're looking for Brian outside of thesis studio, you'll likely find him at the State College Presbyterian Church, where he spends 10-15 hours a week in fellowships, Bible studies, prayer groups, and worship services. Otherwise, he might be playing guitar or sax, golfing, cooking, or cheering his beloved Chicago Cubs into the postseason!
