

Indianapolis International Airport –
Midfield Terminal
Indianapolis, IN

Acknowledgements

I would like to express my sincere appreciation to all the people along the way that has helped me or involved in this entire AE senior thesis process.

The designers from HOK, engineers from Syska Hennessy, and faculties at the Architectural Engineering Department have given me tremendous support and guidance to complete my thesis.

A special thank you goes to:

David Ziolkowski (Project Designer) for all your patience and always being there to help. Thank you for all the available INDY airport information packages, consultation and advices. Without David, I could not have completed this thesis.

Tom Kazckowski (Director of Lighting) for all the support HOK Lighting Group has provided me with.

Don Ferderko (Senior Designer) for being one of the greatest mentor. Thank you for making such a sincere effort in obtaining me the drawings as well as arranging the non-disclosure agreement with HOK, IAA and Syska Hennessy. Without Don, I could not have even started this thesis.

Ripley Rasmus (Director of Design) for allowing me the permission to use this project as my senior thesis.

Jeff Ryan and Ben Fehrmann (Senior Designers) for all the Schematic Design Report information.

Raissa Denenberg (Senior Associate) from Syska Hennessy for all the electrical drawings.

Dr.Moeck, Dr. Mistrick, and Ted Dannerth(Principal) from Tower Engineering for their helpful advice on all the lighting/electrical assignments.

Benjamin Noggle, David Maino and Steve Puchek, Youn-Ju Yoon for all their effort in taking their time out, to help me resolve my lighting or electrical obstacles.

Last but not least, I want to express my deepest appreciation to my family for making this education possible for me.

Thank you all!!
