New Middle School Geneva, II

Greg Kemerer AE Senior Thesis 2006 – CM Option

Presentation Outline

Background Analysis 1 Analysis 2 Analysis 3 Background -Building, project, and site information

Analyses

ullet

-In depth discussion of each analysis

Questions

 A little Q & A

Background

Background

Analysis 1 Analysis 2 Analysis 3

Owner Information

Currently overseeing:

Background

Analysis 1 Analysis 2 Analysis 3

5 elementary schools 1 middle school 1 high school

Chief concerns:

space, cost, durability, safety, schedule

The Building

Background

Analysis 1 Analysis 2 Analysis 3

The Building

Background

Analysis 1 Analysis 2 Analysis 3 Size: 196,000 sq ft Construction: 5/16/05 – 8/29/06 Hard Cost: \$28,800,000 Delivery Method: Design-big-build, CM Agent

The Team

Background

Analysis 1 Analysis 2 Analysis 3 Owner: Geneva Community Unit School District #304 Architect: Larson and Darby Group Construction Manager: Bovis Lend Lease Consultants: Rempe-Sharpe and KJWW

The Systems

Mechanical

Background

Analysis 1 Analysis 2 Analysis 3 HVAC: (2) 300 ton air cooled chillers, 6 AHUs, dust control system

Heating: 2-pipe heated water system, (2) 250 BHP boilers, individual fan coil units throughout

Additional Heating: 2,340 linear feet of radiant ceiling panels

The Systems

Electrical

Background

Analysis 1 Analysis 2 Analysis 3 Supply: 2732 KVA 480/277 line Main Distribution: 4,000 A, 480/277, 3 Phase Transformers: (2) 500 KVA, (1) 225 KVA Generator: 250 KVA, 480/277, cross-linked to existing middle school

Fire Protection

4 zone, wet system smoke detectors and alarms

The Systems

Structural

Background

Analysis 1 Analysis 2 Analysis 3 Unit A/C: Single story. 12" CMU load bearing masonry on concrete strip footings

Unit B: Two story. Structural steel with combination architectural precast and face brick. Flooring is 12" hollow core precase with 3" poured slab topping. Basement utilizes step footings to match CMU coursings.

The Site Plan

Background

Analysis 1 Analysis 2 Analysis 3

Analysis 1

Background Analysis 1 Analysis 2 Analysis 3

Interior Wall System, Building B

Intent

Building B Interior Wall Type

Background Analysis 1 Analysis 2 Analysis 3

Burnished face CMU

durable, attractive, high fire rating expensive, heavy, coordination issues

Metal stud wall

lightweight, inexpensive, fewer coordination issues less durable, thermal bridging, sound transmission

Methods

Wall takeoff

Background Analysis 1 Analysis 2 Analysis 3 Calculate unit weight of different wall types Calculate total weight difference Re-size structural steel members Calculate cost savings for steel and new wall type

Weight Savings

Existing System: Stud Wall System: Savings:

1,050,742 lbs 128,848 lbs 921,894 lbs

Total Difference of 461 Tons

-or-

18.43 psf of dead load

Structural Steel

Conclusion

Background Analysis 1 Analysis 2 Analysis 3

Stay With Initial Wall System

Analysis 3

Background Analysis 1 Analysis 2 Analysis 3

Obstacles to Building Green Schools

Intent

Background Analysis 1 Analysis 2 Analysis 3 To better understand why more schools aren't being built green and find the obstacles that are allowing this to happen

Benefits:

Reduced Energy Bills

Smaller Environmental Impact

Better Student Performance

Methods

Background Analysis 1 Analysis 2 Analysis 3 Online research Phone interviews More phone interviews

The Way Schools Build

Background Analysis 1 Analysis 2 Analysis 3 Funding from tax dollars or referendum

Community Involvement referendum, forum, SC had no requirement projects were at various states or preparation

Hired Outside Architects Geneva had an in-house architect

Findings

Background Analysis 1 Analysis 2 Analysis 3 Schools and districts generally unaware of benefits of green design. Also unaware of government green incentive programs.

Architects always suggested the green design had to do "some convincing" Non-Green Schools various excuses insisted green was still on their minds

Conclusion

No green buildings without green design

Background Analysis 1 Analysis 2 Analysis 3

Owner and community education

Government incentives
