CREDITS AND ACKNOWLEDGEMENTS

I want to thank and acknowledge everyone who has assisted me during this senior thesis. The help and support you all have given me is greatly appreciated and has allowed me to complete this final report.

The AE Department:

- To the structural professors. Without you, this thesis would not have been possible.
- A special thanks to my thesis advisor, Professor Kevin Parfitt for helping to clarify all the unclear topics I approached him about.

Ewing Cole:

- Thank you for providing me with the drawings, pamphlets, and specifications on Memorial Sloan-Kettering. Your cooperation throughout this entire year has allowed my thesis to go as smoothly as possible.
- A special thanks to Oscar Gomes and Brent Ellmann for their continuous help to answer my questions with amazing insight. I cannot thank you both enough.
- I also need to thank Steve Neimeister for introducing me to MSK and offering me practical advice throughout this project.

Friends and Family:

- Mom and Dad, thank you for the love and support you both have always given me in whatever I do. I dedicate this thesis to you.
- My friends who constantly call and wonder where I'm at. Thank you for giving me a hard time and reminding me that I still have a social life.
- To all the other AE's for making the thesis lab a somewhat enjoyable place to be.
- And last but certainly not least to Stephanie Laudadio, who has been as supportive and understanding as any girlfriend could be. You have made me realize how truly lucky I am to have you in my life.
