## **Table of Contents**

1.0	Executive Summary .....	1
2.0	Introduction .....	2
2.1	Objective .....	2
2.2	Scope .....	2
2.3	Methods.....	2
3.0	Building Background.....	3
4.0	Existing Conditions .....	4
4.1	Architecture .....	4
4.2	Building Envelope.....	4
4.3	Electrical.....	4
4.4	Lighting.....	4
4.5	Structural .....	5
4.6	Fire Protection .....	5
4.7	Mechanical .....	5
5.0	Existing Condition Analysis of Standards .....	7
5.1	LEED-NC Version 2.2 .....	7
5.2	Design Ventilation Requirements – ASHRAE Standard 62.1-2004 .....	7
5.3	Building Envelope – ASHRAE Standard 90.1-2004 .....	8
5.4	HVAC Systems – ASHRAE Standard 90.1-2004 .....	9
5.5	Power – ASHRAE Standard 90.1-2004 .....	11
5.6	Lighting – ASHRAE Standard 90.1-2004 .....	12
6.0	Mechanical Redesign – Depth.....	13
6.1	Air Systems .....	13
6.2	Central Plant Systems.....	17
6.2.1	Chiller Options .....	18
6.2.2	Free Cooling Options.....	23
6.3	Mechanical Conclusions.....	32
7.0	Electrical Redesign – Breadth Topic 1 .....	34
8.0	Construction Cost Impacts – Breadth Topic 2.....	36
9.0	Life Cycle Cost Analysis .....	41
10.0	Conclusions .....	42
11.0	Recommendations.....	43
12.0	References .....	44
13.0	Appendix A – LEED-NC Version 2.2 Evaluation .....	45
14.0	Appendix B – Existing VAV Unit Ventilation Requirements .....	47
15.0	Appendix C – VAV Electric Panels .....	52
16.0	Appendix D – DOAS Electric Panels .....	58
17.0	Appendix E – Detailed Electrical Initial Costs .....	64
