

## Table of Contents

<b>Title Page</b> .....	1
<b>Thesis Abstract</b> .....	2
<b>Thesis Executive Summary</b> .....	5
<b>Acknowledgements</b> .....	6
<b>Project Introduction and Background</b> .....	7
Client Information.....	7
Project Delivery Method.....	9
Project Schedule Summary .....	11
Building Systems Summary.....	12
<b>Soil Remediation Analysis</b> .....	16
Executive Summary .....	16
Site Condition Overview.....	17
Deep Dynamic Compaction .....	19
Complete Soil Exchange.....	23
Recommendation and Conclusion .....	25
<b>Breadth #1: Precast Superstructure and Architectural System</b> .....	27
Overview.....	28
Understanding Design of Existing Structure .....	30
Existing Superstructure Cost and Schedule .....	34
Alternative Precast Design Analysis.....	35
Connection Details of Precast.....	37
Alternative Schedule and Cost.....	42
Recommendation and Conclusion .....	47
<b>Breadth #2: Temporary Heat Analysis</b> .....	49
Overview.....	49

Procedure .....	50
Design Analysis .....	52
Results and Conclusion.....	54
<b>Precast Concrete Safety Research and Analysis.....</b>	<b>56</b>
Executive Summary .....	56
Precast Safety Problems.....	57
Precast Concrete Safety Survey .....	60
A Model Company.....	63
Lessons to Take From Research .....	65
<b>Residence Hall 2 Site Specific Safety Plan.....</b>	<b>66</b>
Preconstruction Phase .....	66
Precast Erection .....	67
Post Erection Precast Safety Precautions.....	68
Conclusion .....	69
<b>Senior Thesis Summary and Conclusion.....</b>	<b>70</b>
<b>Soil Remediation Appendix.....</b>	<b>70</b>
<b>Precast Superstructure and Architectural System Appendix.....</b>	<b>75</b>
<b>Temporary Heat Appendix.....</b>	<b>87</b>
<b>Precast Safety Appendix.....</b>	<b>94</b>
