

LUTRON COMMENTS

Presentation – Wednesday, December 9, 2009

Coopersburg, PA

Helen Diemer, The Lighting Practice

OFFICE

- Tense vs. Relaxed needs better distinction
 - Tense with high ambient and relaxed with downlight
 - Not properly conveyed in model, renderings

ATRIUM

- Summary slide is good, helpful
- Perspective renderings a bit confusing and elevations hard to read, a plan may be more useful
- Skylight location needs to be clearly indicated
- Overall: concepts are good but rendering is too timid

Sandra Stashik, Grenald Waldron Associates

FAÇADE

- Good color accent, but the light needs to be shown on all surfaces in the renderings
- Make sure contrast in images is appropriate, one was stronger than the other

ATRIUM

- Elevations were confusing
- Night rendering was not strong, stick with either day rendering or night rendering

OFFICE

- Ideas need to be more defined, less tense
- Good use of plans to show ideas
- Nice job taking audience through step-by-step
