

- 1. Introduction**
 - a. Title Slide (3)
 - b. Index (1)
 - c. Existing Building Stats/Site (3)
 - d. Project Team (1)
 - e. Existing Architecture/Facts (2)
- 2. Existing Structural System**
 - a. Overview (1)
 - b. Super structure (3)
 - c. Lateral System (3)
- 3. Problem Statement**
 - a. Schedule, Framing Details (2)
 - b. Induced Cost (1)
- 4. Problem Solution**
 - a. Gravity System (1)
 - b. Lateral System (1)
 - c. Goals (1)
- 5. Two Way Flat Plate Design**
 - a. Materials/Assumptions/Goals (1)
 - b. Floor Layouts/Bay Sizes (1)
 - c. Design Process
 - i. Hand Calcs/Equiv. Frame (1)
 - ii. spSLAB (1)
 - iii. RAM Concept (2)
 - d. Design Concerns (2)
 - i. Punching Shear
 - ii. Slab Edges
- 6. Lateral System Design**
 - a. Materials/Assumptions/Goals (1)
 - b. System Layout
 - i. Concrete Moment Frames (1)
 - ii. Shear Walls (1)
 - c. ETABS Analysis (2)
 - d. Design Process
 - i. Section Cuts (1)
 - ii. Concrete Moment Frame Hand Calcs (1)
 - iii. Concrete Moment Frame spColumn (2)
 - iv. Shear Wall Hand Calcs (1)
 - v. Shear Wall spColumn (1)
- 7. Truss Design**
 - a. Hand Calcs (1)
 - b. SAP2000 Output (1)
- 8. Construction Management Breadth**
 - a. Introduction (1)
 - b. Effects of the Schedule (2)
 - c. Cost Comparison (2)
 - d. Coordination Concerns (1)
 - e. Site Logistics (2)
- 9. Conclusion**
 - a. Summary (1)
 - b. Review Goals (1)
 - c. Acknowledgements/Comments & Questions (1)
