

Acknowledgements

Professional -

The Smith Group, especially Il Kim and Rachael Granico for providing the plans and building information, and also for aide with design insights.

Ted Dannerth for his professional input and aide in assisting me with my electrical design.

Faculty -

Dr. Mistrick and Dr. Moeck for their professional advice and tips in regard to the lighting design for my different rooms.

Everyone Else -

All 5th Year Thesis Students – Thank you to all the people that have helped with either insight to my design or just general support throughout the entire year. Additional thanks to Philip Mackey for aide with my electrical systems, Nathan Patrick for help in using the HAP software, and Jason McFadden for help with my construction management breadth and locking me down in the studio so I actually got my project done.

Family and Friends – Thank you for accepting the fact that I simply fell off the face of the planet for a couple month, and offering support and comfort when it was needed the most. Also thanks to my girlfriend Tamara Mckenzie for understanding and dealing with any bitterness or resentment I may have shown over the past month.

Anyone Else – My sincerest apologies for forgetting to mention among the rest, but know that any help that was given was greatly appreciated.

Thank you again to everyone who helped me complete this project.
