

## Lutron Presentation Comments

Luke Tieg:

- How do you achieve atmosphere description?
- Label 4<sup>th</sup> slide as inspiration so to not confuse with my own building
- Stack area check light levels at bottom of stacks
- By eliminating the back wall of the glass curtain wall-investigate how much light you would actually get and if that's enough to be a "beacon"
- Exterior - highlight columns, architectural element
- Draw building in 6 strokes to determine what architectural aspects are important and should be accentuated

Sandra Stashik:

- Design Concepts were very powerful – end with something just as powerful
- Liked sketching technique, but wants it to be more vibrant
- Exterior – columns need to be addressed
- Exterior – LIBRARY letters maybe should be lit and not silhouetted
- Exterior – center of façade should be highlighted more than side walls
- Lobby – maybe all walls shouldn't be uniformly lit to add highlight to certain areas and add hierarchy in the space
- Technique and slide set-up was easy to follow and flowed well
