

## Acknowledgements

First and foremost I would like to extend a big thank you to everyone who has helped me out over the last five years and helped me to achieve my goal of becoming a Structural Engineer.

### Special Thanks goes to:

- ~Mike Wuerthele & Jeremy Urban of Whitney, Bailey, Cox, & Magnani for all the drawings, answers, and your continued support throughout Thesis
- ~Betsy Garrity of WTW Architects for extensive building information
- ~Chris Holcombe of Milton Steel for moment connection cost data
- ~Dr. Linda Hanagan for being a great source of knowledge as my Thesis Advisor as well as allowing me to sit in on your connections class this semester
- ~Dr. Kevin Parfitt for all the Thesis guidance and setup that makes it easy for us students to get through the entire process
- ~Dr. David Riley & Dr. Moses Ling for being my Faculty Advisors and helping me through the last five years of scheduling
- ~The AE Faculty & Staff for providing me with a top-notch education and a great college learning experience
- ~My dearest friends who I'll not soon forget...you guys are the reason I made it this far and I have always been able to count on you for anything
- ~Last but not least, My Family for always believing in me and for giving me every opportunity possible to succeed
