

Cathedral Place

Steven Puchek

Milwaukee, WI

Executive Summary

Technical Assignment #3 is the PowerPoint presentation developed and put together based on the sketches, renderings, Photoshop alterations, and fixture/equipment details developed as part of the lighting redesign for the selected spaces. The PowerPoint file was used in the presentation given at Lutron headquarters in Coopersburg, PA on December 6th to present the lighting redesign proposals and schematic designs to three professional Lighting Designers. The designers present to critique my design were Barbara Horton from Horton Lees Brogden Lighting, Lee Waldron from Grenald Waldron Associates, and Kari Nystrom from Altieri Sebor Wieber, LLC.

The PDF included in the list of files for Technical Assignment #3 has the comments and critiques, as noted by a fellow student, from the three professionals on my presentation. The file of the presentation is included as well, and can be viewed, but not modified.
