

Table of Contents

- Executive Summary 4**
- Project Background 5**
 - Location.....5
 - Building Uses.....6
 - Owners and Management6
 - Construction and Occupancy7
- Existing Conditions 8**
 - Architecture8
 - Existing Lighting Systems.....9
 - Existing Electrical Systems..... 11
 - Existing Mechanical Systems 13
 - Existing Structural System..... 14
 - Orientation, Daylight, and Environment..... 15
 - Utility Services 15
- Architectural Breadth..... 16**
 - Relationship with Thesis Project..... 16
 - Design Program 16
 - Chosen Spaces – Foci..... 16
 - Reception 16
 - Conference Lobby..... 17
 - Open Office 18
 - Additional Architectural Adjustments 18
 - Lobby Façade Canopy..... 18
 - Skylight stair-Well 19
 - Conclusions..... 19
- Structural Breadth 20**
 - Relationship with Thesis Project..... 20
 - Façade Canopy 20
 - Full Cantilever Option 24
 - Tension Cable Option..... 25
 - Skylight stair-Well..... 26
 - Conclusions..... 34
- Lighting Depth 35**
 - Introduction..... 35
 - Research 36
 - Ray-Trace Modeling of a Diffuse Glass 36
 - Light Distribution for Luminous Works of Art..... 38
 - Basic Reflector Design for an Area Source Ceiling 42
 - LED Emitter Use in a Linear Luminaire System 45

Cathedral Place

Milwaukee, WI
Steven Puchek – Senior Thesis Project

Integration of Luminaires into Desk Systems	51
Façade.....	54
Design Concept.....	56
Layout and Controls.....	60
Performance	61
Renderings	62
Parking and Parking Lobby.....	67
Design Concept.....	68
Layout and Controls.....	72
Performance	73
Renderings	76
Lobby	80
Design Concept.....	84
Layout and Controls.....	88
Performance	89
Renderings	91
Reception	95
Design Concept.....	96
Layout and Controls.....	99
Performance	100
Renderings	103
Conference Lobby	109
Design Concept.....	110
Layout and Controls.....	113
Performance	114
Renderings	116
Open Office.....	122
Design Concept.....	123
Layout and Controls.....	126
Performance	127
Renderings	129
Electrical Depth	136
Relationship with Thesis Project.....	136
Proposal	136
Modeling Loads.....	137
Distribution Configuration and Explanations	138
Panelboard Layouts and Assumptions.....	140
Metering and Tenant Billing	140
Emergency Distribution Design and Analysis	141
Cost Analysis.....	142
Conclusions.....	142
Mechanical Breadth	143
Relationship with Thesis Project.....	143

Cathedral Place

Milwaukee, WI
Steven Puchek – Senior Thesis Project

Proposal 143
Load Modeling 143
Microturbine Usage and Parallelizing 145
Integration with Electrical System and Emergency Distribution 146
Combined Heat and Power Yearly Analysis 146
Conclusion 150
Overall Conclusion..... 151
