

## Presentation Outline

### Building Systems Integration: Energy and Cost Analysis

## The Milton Hershey School New Supply Center Hershey, Pennsylvania

### Prepared for:

William P. Bahnfleth, Ph.D., P.E., Professor  
Department of Architectural Engineering  
The Pennsylvania State University

### Prepared by:

Justin Bem  
Mechanical Option  
March 9, 2007

<b>Introduction</b>		<b>Pages</b>
Self Introduction	Title of Project: Building System Integration	1
<b>Presentation Outline Overview</b>		1
<b>Project Building Background</b>		
Owner, Location, Size, Cost	Building Occupancy Types	2
<b>Existing Mechanical Conditions</b>		
Air Side	Water Side	Walk-in-Freezer Condenser Loop
		3
<b>Mechanical System Redesign</b>		
Goals and Objectives	<i>DOAS/Water Source Heat Pumps</i>	<i>Condenser Water Loop Heat Recovery System</i>
	<i>Absorption Chiller-Heater Technology</i>	<i>Redesigned Chiller/Boiler Plants</i>
	<i>Economic Analysis and System Integration Conclusion</i>	12
<b>Structural/Construction Breadth</b>		
<i>AHU Relocation Roof Structure Impact</i>	<i>Mezzanine Floor Detailed Cost Estimate</i>	5
<b>Electrical Breadth</b>		
<i>Redesign's Effect on Power Systems</i>		2
<b>Conclusions and Recommendations</b>		2
<b>Acknowledgements</b>		1
<b>Questions</b>		1
		<b>30</b>
