

Sandra Stashik

Nice overall presentation

Told what was wanted and followed through

Great concepts

Good 3D sketches for understanding spaces

Canopy: Good ideas for canopy at nighttime, what about daytime?

Look at canopy brick wall being washed by LEDs

Be careful washing dark red brick with color

Lobby: Lobby had good concept

Incorporate sparkle into the gypsum board panel, not only the tight beams of light

Theatre: Theatre needs ambient lighting

Be careful with accents on red wall

Kari Nystrom

Spoke too fast

Black background with blue streaks is too distracting

Comfortable and interesting for design goal doesn't fit with "come alive" theme

Canopy: Great design goals

Was not executed enough

Needs more highlights

Choose color scheme

Use different image for 3D sketch- current image is confusing

Lobby: Great design goals

Uplights on the catwalk will not work well- use track or adjustables

Theatre: Needs ambient lighting

Red wall may be distracting

Luke Tique

Slide background was distracting

Good explanation of floor plans and circulation

Canopy: Gobos are great for edgy design goals

LEDs on frosted glass is used too often

Consider daytime solution for canopy

Lobby: Space will draw people in by edgy design rather than canopy drawing people in

Too many ideas- pick one or two to follow through with

Use architecture more

Need better solution for gypsum board panel- help people move through space

Light stairs to additional drama

Theatre: Express equipment and theatre mechanics to enhance sparkle

Don't use red light on red wall

Office: Washing or grazing the wall?

Don't choose warm light for orange wall
