

Bridge and Marine Construction since 1903
BALTIMORE, MD NORFOLK, VA
www.mcleancont.com

Corporate Info:

Founded in 1903, McLean Contracting Company is fully owned by its active employees through an Employee Stock Ownership Plan. The company and its 300 employees have extensive experience in both land and marine based heavy construction, such as piers and bridges. McLean operates in the Mid-Atlantic region from its home office in Glen Burnie, MD and self-performs the majority of its contract work with support from its regional offices/equipment yards in Curtis Bay, MD and Chesapeake, VA. Historically, McLean has promoted from within our own employee base. With a strong tradition of integrity, efficiency, preparedness, employee relations, and commitment to safety, a career with McLean may be the right choice for you!

Currently Hiring (posted 4/10/15):

Field Engineers

McLean Contracting Company is currently interviewing Field Engineer candidates for a few entry-level job openings in the Tidewater Virginia and Baltimore Maryland regions. It is desirable for Field Engineers to have earned a bachelor degree in Civil Engineering, Construction Management, or Civil Engineering Technology or dual associate degrees in Civil Engineering Technology/Surveying Technology. Construction experience and surveying ability is highly valued. Primarily, a person in this position will report to a jobsite field office, whose location may require regional travel. Field Engineers are generally assigned to a single project at any one time. A summary of job requirements and typical work is presented below:

Requirements

- Must be able to read and interpret drawings and specifications.
- Must have the ability to perform and be proficient in geometrical and mathematical calculations.
- Must have knowledge and ability necessary to perform layout and surveying.
- Must have knowledge of basic computer systems and software.
- Must be able to communicate effectively both orally and in writing.
- Must be able to climb, work at various heights and lift a minimum of 50 lbs.
- Must be willing to work outdoors in all weather conditions.

Job Tasks

Field Engineers report to the project Superintendent, with whom they work closely to gain experience and assume more job site responsibility. They are considered part of on-site management and are responsible for various aspects of each project, primarily including all construction layout and project documentation. Field Engineers are also responsible for other tasks which may typically include construction planning, scheduling, material procurement, project safety, quality control, progress payments, supervision of subcontractors, quantity tracking, cost estimating, & design of temporary structures (if qualified).
